

Power Drive Systems

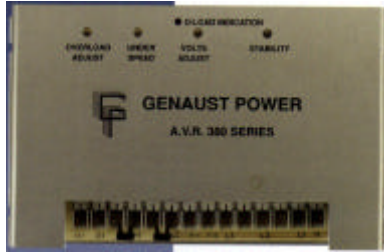

Generator Control Specialists

Ph. 07 3350 4594

Fax. 07 3350 1654

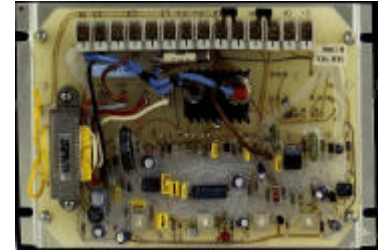

For the past 20 years, Power Drive Systems has specialised in the installation, repair and service of Generator controls: Automatic Voltage Regulators (AVRs), Battery Chargers, Automatic Generator Management Systems etc. Also UPS units, alternate associated power generation equipment, electrical design, and custom built control panels. During that time the company has built a reputation of consistently providing excellent service and high quality workmanship.

Power Drive Systems is also a distributor for the following quality products:

Automatic Voltage Regulators

Australian made range of fully compatible replacements for many commonly used AVRs. Also control modules such as Voltage & Speed sensing, Battery charging, Fuel, Engine protection and control, Timing & Synchronising units.

Electronic Governor Systems

GAC is a world leader in electronic governors, offering a full range of analogue and digital governing equipment with the widest range of integral actuator systems to suit most fuel injection pumps.

Products also available for Loadsharing & Synchronising, Locomotive & Variable speed control systems .

BERNINI Engine & Genset Controllers

A range of integrated controllers for engines, gensets, & pumps, and also AMF controllers. These packaged units incorporate start/stop functions, engine and generator protection, instrumentation and auto start facilities. With RS 232C interfaces and software for remote control and monitoring available on the more advanced models. The product line that is suitably priced for every application.

Genset Control Systems

Comap controllers cover the range from single AMF sets to multi-set installations with facilities for mains parallel operation. Other items in the Comap range include : Gas injection control systems, Co-gen controllers, Misfiring detectors, Mains decoupling relays, Electronic potentiometers.
